# GLOSSARY OF TERMS

The following abbreviations have been used throughout this document:

Abbreviation	Meaning
<b>ADR</b>	European Agreement concerning the International Carriage of Dangerous Goods by Road (2019)
<b>CPS</b>	Connect Plus Services
<b>DfT</b>	Department for Transport
<b>DVSA</b>	Driver & Vehicle Standards Agency
<b>EMA</b>	Essex Marshalling Area
<b>IBC</b>	Intermediate Bulk Container
<b>KMA</b>	Kent Marshalling Area
<b>LQ</b>	Limited Quantities
<b>MEGC</b>	Multi Element Gas Container
<b>TC</b>	Transport Category
<b>TOC</b>	Tunnel Operations Centre
<b>TOS</b>	Highways England Traffic Officer Service
<b>TRC</b>	Tunnel Restriction Code
<b>UN</b>	United Nations

# DARTFORD CROSSING

## DANGEROUS GOODS LISTING

### 1 Summary

This document has been produced to give guidance for the restrictions in place relating to the transit of dangerous goods through the Dartford tunnels.

Dartford tunnels have been classified as category 'C' tunnels under the ADR regulations and as such some dangerous goods are banned from using the tunnels and others can only transit under special conditions.

The management of dangerous goods within the Dartford tunnels is based on the approach that the haulier is legally responsible for complying with the ADR regulations. All vehicles carrying dangerous goods northbound (with the exception of Limited and Excepted Quantities and loads below the Small Loads Threshold) are required to exit at Junction 1A and enter the Kent Marshalling Area (KMA) where Connect Plus Services (CPS) will undertake a cursory visual inspection of the vehicle for obvious faults and the driver is to state if they are aware of any problems with the vehicle.

When the QEII Bridge is closed and the east tunnel is being used for southbound traffic, all vehicles carrying dangerous goods (with the exception of Limited and Excepted Quantities and loads below the Small Loads Threshold) are required to fully comply with this document and follow signage to the Essex Marshalling Area (EMA) to wait processing.

The CPS will review the haulier's documentation, which must give details of the UN number, substance name, packing group and the tunnel restriction code. There is no requirement to check packaging sizes and weight other than the specific requirement relating to tunnel restriction code C5000D or if goods are being carried in Limited or Excepted Quantities. When presented with a load that has a tunnel restriction code of C5000D the CPS will confirm with the vehicle driver that the ADR load does not exceed 5000kg.

Loads falling in the Dartford tunnels specific operating restriction of 'Clear tunnel, single vehicle' will only be allowed to transit the Dartford tunnels between the hours of 22:30 and 05:00.

The ADR regulations do not apply to loads intended for domestic use, i.e. loads carried by a private individual for domestic purposes.

## 2 Application of ADR Regulations to Dartford Tunnels

It is the responsibility of the haulier to comply with the ADR regulations. All vehicles carrying dangerous goods northbound (with the exception of Limited and Excepted Quantities and loads below the Small Loads Threshold) are required to exit at Junction 1A and follow the diamond symbol, as detailed in Figure 1, to the Kent Marshalling Area (KMA) to await processing.

Figure 1: Diversion symbol to Kent Marshalling Area

When the QEII Bridge is closed and the east tunnel is being used for southbound traffic, all vehicles carrying dangerous goods (with the exception of Limited and Excepted Quantities and loads below the Small Loads Threshold) are required to fully comply with this document and follow signage, as detailed in Figure 2, to the Essex Marshalling Area (EMA) to await processing.

Figure 2: Signage to Essex Marshalling Area

### 3 ADR Category ‘C’ Rating

#### 3.1 ADR Tunnel Rating System

The ADR regulations have been produced to simplify and standardise the signing of tunnel restrictions across Europe. The restrictions are split into five different tunnel categories as detailed in Table 1 below.

Tunnel Category	Restrictions
A	No restrictions for the transport of dangerous goods
B	Restriction for dangerous goods which may lead to a very large explosion
C	Restriction for dangerous goods which may lead to a very large explosion, a large explosion or a large toxic release
D	Restriction for dangerous goods which may lead to a very large explosion, a large explosion, a large toxic release or a large fire
E	Restriction for all dangerous goods other than UN Nos. 2919 and 3331

**Table 1: Tunnel Categories**

Dartford tunnels are rated as category ‘C’, but with some additional Dartford tunnels specific operating restrictions to safely manage the transit of dangerous goods e.g. vehicle convoys.

Appendix A has a full list of dangerous goods together with the specific operating restrictions in place for the Dartford tunnels.

### 3.2 Carriage of Dangerous Goods for Domestic Use

The provisions laid down in ADR do not apply to:

*"The carriage of dangerous goods by private individuals where the goods in question are packaged for retail sale and are intended for their personal or domestic use or for their leisure or sporting activities provided that measures have been taken to prevent any leakage of contents in the normal conditions of carriage. When these goods are flammable liquids carried in refillable receptacles filled by, or for, a private individual, the total quantity shall not exceed 60 litres per receptacle and 240 litres per transport unit. Dangerous goods in IBC's, large packagings or tanks are not considered to be packaged for retail sale."*

This means that dangerous goods carried by private individuals, for example, gas cylinders for caravans or barbecues are not covered by the ADR regulations and should be allowed passage through the tunnels without restriction i.e. they do not have to report for checking provided the conditions above are met. Dangerous goods in IBC's, large packagings or tanks are not exempt under the domestic use provision and are treated as commercial dangerous goods and are therefore required to comply with the full requirements of the ADR regulations and the Dartford tunnels specific operating restrictions.

### 3.3 Carriage of Dangerous Goods by the Emergency Services, including Bomb Disposal Units

The provisions laid down in ADR do not apply to:

*"Emergency transport intended to save human lives or to protect the environment provided that all measures are taken to ensure that such transport is carried out in complete safety"*

### 3.4 Carriage of Butane or Propane for Commercial Purposes

Carriage of Butane or Propane for commercial purposes, for example by White Liners or Roofers will be permitted at any time up to a total quantity of 333kg as set out in the Small Load Thresholds in Section **Error! Reference source not found.**. Such vehicles will be allowed through the tunnels without reporting to the KMA (or EMA). Quantities in excess of Small Load Thresholds will be subject to the procedures set out in Section 4, **Error! Reference source not found.** and the Dangerous Goods Listing in Appendix A.

### **3.5 Department for Transport Derogations**

The Department for Transport (DfT) have published a list of derogations which allows certain dangerous goods to be transported in small quantities within the UK without having to comply with the ADR regulations.

The DfT derogations have been incorporated into the Dangerous Goods Listing in Appendix A, some dangerous goods that were previously banned or restricted under the ADR regulations can be transported without restriction in small quantities. Dangerous goods that fall into this category have an additional mass added to the Maximum Allowable Tunnel Load column and an additional associated Action.

## 4 Understanding the Dangerous Goods Listing

### 4.1 UN Numbers

The UN number is a four-figure identification number of a substance or article.

### 4.2 Name and Description

The proper shipping name of the substance or article.

### 4.3 Packing Groups

For packing purposes, many substances are assigned to packing groups in accordance with the degree of danger they present:

Packing group I: Substances presenting high danger;

Packing group II: Substances presenting medium danger;

Packing group III: Substances presenting low danger.

### 4.4 Tunnel Restriction Codes and Maximum Quantities

The restrictions for the transport of dangerous goods through tunnels are based on the tunnel restriction code of these goods as described in Table 2 overleaf.

When a transport unit contains dangerous goods to which different tunnel restriction codes have been assigned, the most restrictive of these tunnel restriction codes shall be assigned to the whole load.

Note, for the tunnel restriction code C5000D, there will be a maximum load limit of 5000kg per transport unit when using the Dartford tunnels, all loads of greater than 5000kg are banned.

Tunnel Restriction Code	Restrictions	Dartford Action
<b>B</b>	Passage forbidden through tunnels of category B, C, D and E	Passage Forbidden
<b>B1000C</b>	Passage forbidden through tunnels of category B when the total net explosive mass per transport unit is greater than 1000 kg; Passage forbidden through tunnels of category C, D and E	Passage Forbidden
<b>B/D</b>	Passage forbidden through tunnels of category B and C when carried in tanks; Passage forbidden through tunnels of category D and E	Passage Forbidden in bulk tanks  Otherwise Permitted*
<b>B/E</b>	Passage forbidden through tunnels of category B, C and D when carried in tanks; Passage forbidden through tunnels of category E	Passage Forbidden in bulk tanks.  Otherwise Permitted*
<b>C</b>	Passage forbidden through tunnels of category C, D and E	Passage Forbidden
<b>C5000D</b>	Passage forbidden through tunnels of category C when the total net explosive mass per transport unit is greater than 5000 kg; Passage forbidden through tunnels of category D and E	Passage Forbidden in quantities greater than 5000Kg.  Permitted in quantities of less than 5000kg*
<b>C/D</b>	Passage forbidden through tunnels of category C when carried in tanks; Passage forbidden through tunnels of category D and E	Passage Forbidden in bulk tanks.  Otherwise Permitted*
<b>C/E</b>	Passage forbidden through tunnels of category C and D when carried in tanks; Passage forbidden through tunnels of category E	Passage Forbidden in bulk tanks.  Otherwise Permitted*
<b>D</b>	Passage forbidden through tunnels of category D and E	Permitted*
<b>D/E</b>	Passage forbidden through tunnels of category D when carried in bulk or in tanks; Passage forbidden through tunnels of category E	Permitted*
<b>E</b>	Passage forbidden through tunnels of category E	Permitted*
-	Passage allowed through all tunnels	Permitted*

**Table 2: Tunnel Restriction Codes**

\* Additional operating restrictions may be imposed for safety reasons, as described in Section 4.5, refer to Appendix A for a full list of dangerous goods and associated restrictions.

## 4.5 Dartford Tunnels Specific Operating Restrictions

Additional operating restrictions have been put in place at the Dartford tunnels to safely manage the transit of permitted dangerous goods. These additional restrictions are outlined in Table 3 below. Refer to Appendix A for a full list of dangerous goods and additional operating restrictions.

Restriction	Meaning
<b>Banned</b>	The vehicle is not allowed in the tunnels.
<b>Banned (In tanks)</b>	The vehicle is not allowed in the tunnels when transporting in bulk tanks.
<b>Clear tunnel, single vehicle</b>	The tunnel is cleared and the vehicle is allowed in by itself without an escort. <b>(Only permitted between 22:30 and 05:00 hours)</b>
<b>Single vehicle convoy</b>	A dangerous goods vehicle, which is authorised to travel through the tunnel by itself with an escort/block vehicle following to maintain a safety margin of a minimum of 50m between the following general traffic and to avoid dangerous overtaking manoeuvres.
<b>Convoy</b>	A group of dangerous goods vehicles, which have been authorised through the marshalling area to the forward holding bays. The convoy travels under escort through the tunnel in single file with an escort/block vehicle following to maintain a safety margin of a minimum of 50m between the convoy and following general traffic.
<b>Check and allow</b>	CPS will undertake a cursory visual inspection of the vehicle for obvious faults and ask the driver to state if they are aware of any problems with the vehicle. If no faults are found, or the driver does not declare any problems, it is allowed to enter the tunnels without an escort via junction 1a or 1b.

**Table 3: Dartford Specific Operating Restrictions**

It should be noted that the restriction of 'Clear tunnel, single vehicle' is only permitted between the hours of 22:30 and 05:00, this is due to the impact that closing one of the tunnel bores would have on traffic flows during peak travel periods.

## Appendix A – Dangerous Goods Listing

U.N No.	Name and Description	Packing Group	Tunnel Restriction Code	Transport Category	Maximum Allowable Tunnel Load	Dartford Action	Limited Quantities	Excepted Quantities
0004	Ammonium picrate, dry or wetted with less than 10 percent water, by mass	-	B1000C	1	-	Banned	0	E0
0005	Cartridges for weapons, with bursting charge	-	B1000C	1	-	Banned	0	E0
0006	Cartridges for weapons, with bursting charge	-	B1000C	1	-	Banned	0	E0
0007	Cartridges for weapons, with bursting charge	-	B1000C	1	-	Banned	0	E0
0009	Ammunition, incendiary with or without burster, expelling charge, or propelling charge	-	B1000C	1	-	Banned	0	E0
0010	Ammunition, incendiary with or without burster, expelling charge, or propelling charge	-	C5000D	1	5000kg	Single vehicle convoy	0	E0
0012	Cartridges for weapons, inert projectile or Cartridges, small arms	-	E	4	-	Check and allow	5kg	E0
0014	Cartridges for weapons, blank or cartridges, small arms, blank or cartridges for tools, blank	-	E	4	-	Check and allow	5kg	E0
0015	Ammunition, smoke, with or without burster, expelling charge, or propelling charge	-	B1000C	1	-	Banned	0	E0
0016	Ammunition, smoke, with or without burster, expelling charge, or propelling charge	-	C5000D	1	5000kg	Single vehicle convoy	0	E0
0018	Ammunition, tear-producing with burster, expelling charge, or propelling charge	-	B1000C	1	-	Banned	0	E0
0019	Ammunition, tear-producing with burster, expelling charge, or propelling charge	-	C5000D	1	5000kg	Single vehicle convoy	0	E0
0020	Ammunition, toxic with burster, expelling charge, or propelling charge	-	PROHIBIT	-	-	Banned	-	-
0021	Ammunition, toxic with burster, expelling charge, or propelling charge	-	PROHIBIT	-	-	Banned	-	-
0027	Black powder or Gunpowder, granular or as a meal	-	B1000C	1	< 5kg > 5kg	Check and allow Banned	0	E0
0028	Black powder, compressed or Gunpowder, compressed or Black powder, in pellets or Gunpowder, in pellets	-	B1000C	1	< 5kg > 5kg	Check and allow Banned	0	E0
0029	Detonators, electric, non-electric, for blasting	-	B1000C	1	-	Banned	0	E0
0030	Detonators, electric, non-electric, for blasting	-	B1000C	1	-	Banned	0	E0
0033	Bombs, with bursting charge	-	B1000C	1	-	Banned	0	E0
0034	Bombs, with bursting charge	-	B1000C	1	-	Banned	0	E0
0035	Bombs, with bursting charge	-	B1000C	1	-	Banned	0	E0
0037	Bombs, photo-flash	-	B1000C	1	-	Banned	0	E0

U.N No.	Name and Description	Packing Group	Tunnel Restriction Code	Transport Category	Maximum Allowable Tunnel Load	Dartford Action	Limited Quantities	Excepted Quantities
0038	Bombs, photo-flash	-	B1000C	1	-	Banned	0	E0
0039	Bombs, photo-flash	-	B1000C	1	-	Banned	0	E0
